Summary

Frontend-focused software engineer who shipped a production React Native e-commerce app on iOS and Android, from UI build to CI/CD releases. Skilled in React, React Native, TypeScript and modern CSS (Tailwind), with 100+ DSA problems solved and bug fixes across shared component libraries used by 200+ apps.

Internships

AppBrew Jun 2026 – Present
Software Engineer Intern *India*

- React Native, TypeScript, Shopify GraphQL, Zustand, GitHub Actions, Fastlane
- Launched a production e-commerce app (The Amyra Store) end to end on iOS and Android: UI implementation, build signing, and six releases through CI/CD.
- Built configurable frontend commerce features: estimated-delivery-date widget, cart notes with packaging opt-out, WhatsApp support widget, colour swatches, and Judge.me reviews integration.
- Fixed UI bugs in shared component libraries used by 200+ apps; root-caused an Android carousel swipe issue on product videos through on-device debugging.
- Resolved client UI/QA tickets via remote config and preview themes, shipping fixes without new app releases.

Intellect Partners Jan 2025 – Aug 2025
Patent Engineer Trainee *Delhi, India*

- Drafted and reviewed patent applications for software and engineering innovations.
- Conducted prior-art searches and technical analysis for software systems.

MXtechlabs Jun 2023 – Aug 2023
Java Developer Intern *Remote*

- Built modular backend features in Java following Agile methodology; improved performance through debugging and optimization.

Projects

TechZone – React E-Commerce Web Application | GitHub | Demo April 2026

- React.js, Vite, React Router, Tailwind CSS, Context API, Fetch API
- Built a responsive e-commerce UI with React Router navigation, global cart state via Context API, and dynamic REST-API-driven product data.
- Implemented URL-based search, localStorage cart persistence, and fully responsive Tailwind CSS layouts.

Job Portal Dashboard – React Admin Interface | GitHub | Demo May 2026

- React.js, Tailwind CSS, React Router, REST APIs, Context API
- Built a responsive admin dashboard with dynamic multi-page routing, reusable UI components, and REST-API-driven job/applicant management.
- Managed global state with Context API and designed mobile- and desktop-friendly layouts with Tailwind CSS.

Online Auction System for Medical Bio-Degradable Waste Mar 2023

- Built a transparent web-based auction platform enabling bidding and payment tracking for sustainable waste disposal.

Technical Skills

Frontend: JavaScript, TypeScript, React.js, React Native, HTML, CSS, Tailwind CSS, Bootstrap
Other Languages & Frameworks: Java, Express.js, REST APIs, GraphQL, Zustand
Databases: MySQL, SQLite
Tools & Platforms: Git, GitHub, GitHub Actions, Fastlane, Postman, VS Code, Vercel, Linux
Core Concepts: Data Structures & Algorithms (100+ problems solved), OOP, HTTP Protocols

Education

Jain University 2021 – 2025
B.Tech Computer Science & Engineering *Bangalore, India*

Delhi Public School 2019 – 2021
High School *Faridabad, India*

Certifications

UpGrad: Object Oriented Principles in Java, Object Oriented Analysis & Design | Languages: English, Hindi
